DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-5, 9: draw to a separating machine that is classified in **class 257**,
subclass 798.

II. Claims 6-8: draw to a method of separating a thinned semiconductor substrate that
is classified in **class 438 subclass 459**.

2. Inventions I and II above are related as device and method. The inventions are distinct if
it can be shown that either:

a) the product (I) as claimed can be made by another and materially different process.

(MPEP 806.05(e)), or

b) the method (II) as claimed can be practiced by another materially different product or
by hand.

For instance, unpatentability of the group I invention would not necessarily imply
unpatentability of the group II invention, since the device of the group I invention could be made
by other processes materially different from those of the group II invention.

Also, the method and device are classified under two different classes which required
serious burden search.

Art Unit: 2818

3. Because the inventions are distinct from the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of the inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

5. A shortened statutory period for response to this action is set to expired 1 (one) months and 0 (zero) day from the date of this letter. Failure to respond within the period for response will cause the application to become abandoned (see 710.02 (b)).
